

PERSONAL PROTECTIVE EQUIPMENT (PPE)

The Smart Lab range of personal protective equipment (PPE) has been sourced to give the user the best possible protection in the workplace and in public at an affordable price.

KN95/FFP2 and Type IIR Medical Face Mask are both available to buy in the smart lab online store and provide protection from particles that could pose a threat to the wearer's health. Furthermore, masks can be used to limit the possibility of inadvertently spreading viral and bacterial particulates creating a physical barrier that limits particles escaping into the air.

Smart Lab PPE can be used in a variety of sectors including healthcare, agriculture, veterinary and within the manufacturing and retail sectors. PPE solutions can also be ordered in small quantities making the Smart Lab site the perfect place to order your personal PPE solutions.

KN95/FFP2 FACE MASK

KN95 / FFP2 face masks are recommended for use by the World Health Organisation (WHO) during outbreaks of SARS, Avian Flu, and Coronavirus.

Smart Lab KN95/FFP2 face masks fit snugly to the face to ensure maximum protection with a filter rate of 95% for particles more than 0.3 microns in size providing efficient protection to the wearers respiratory system.

Features of Smart Lab KN95/FFP2:

- Type KN95/FFP2
- Filters non-oil-based particles
- Protects the respiratory system
- >95% filtration rate
- Snug fit
- Non-reusable

For more information please contact Smart Lab UK at info@smart-labuk.co.uk
